

TECHNICAL SPECIFICATIONS

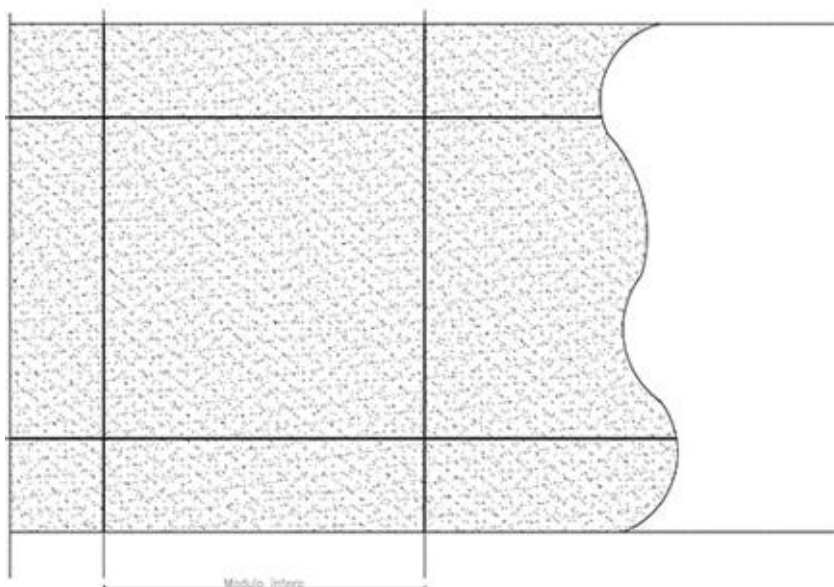

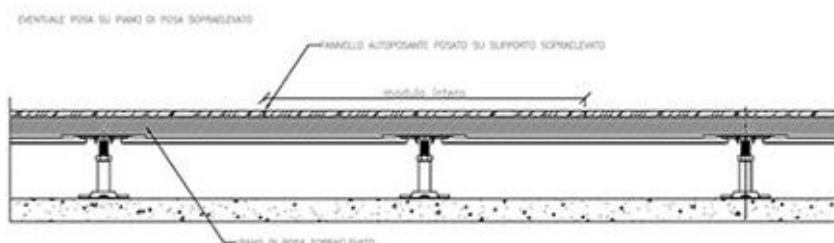

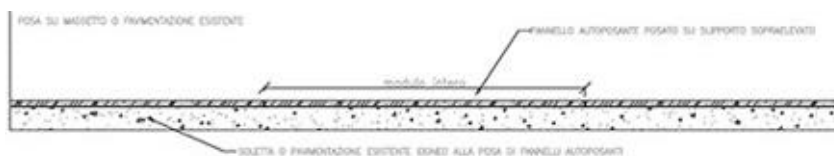

120 x 60, 100 x 100, 75 x 75, 60 x 60 cm panels – 120 x 60, 100 x 100, 75 x 75, 60 x 60 cm tiles.

Porcelain tiles, with a 45° bevel edge are combined with a thinner non-compressible composite material (thickness ~ 2 mm). A special adhesive is used to assemble the support and tile following suitable preparation of the surfaces.

The entire support and porcelain tile panel is edged with a 0.6mm self-extinguishing and anti-squeak plastic trim, giving the sides an approximately 4° slope.

The size of the panel varies depending on the size of the tile.

Components are laid directly onto the floor surface and positioned depending on the design and construction method.

INIZI: DIMENSIONI DEL PANNELLO IN FUNZIONE DEL CALIBRO DELLA LASTRA IN CERAMICA PORCELLANATA
